CHIEF SECRETARIAT, POLITICAL BRANCH, 8. NOV. 1919

DIARY NO. 8494

1919 20 PP 11-19

Office of the Chief Engineer,
Cauvery Valley Irrigation,
Bangalore, 7th Nov. 1919.

From

Rao Bahadur K.Krishnaiengar, Esq., B.A., L.C.E.,
Chief Engineer, Cauvery Valley Irrigation, BANGALORE

To

C.S.Balasundaram Iyer, Esq., B.A.,
Chief Secretary to Government of Mysore, BANGALORE.

Sir,

Adverting to G.O.No.G.419-69/PP 11-19-1 dated the 7th July 1919, laying down procedure for getting articles from -foreign countries, I have the honor to forward herewith a copy of letter No.1003 dated the 20th September 1919 from the Executive Engineer No.I Division, Krishnarajasagara proposing that the purchase of certain patented articles direct from London Firms who are the sole manufacturers of such articles may be made an exception to this rule.

2. This proposal as well as that of getting a wholesale purchase of the general requirements of the Public Works Department, every year in advance is a good one and I recommend the same for the consideration of Government.

I have the honor to be,

S i r,

Your most obedient servant,

K. Krishnaiengar

Chief Engineer, Cauvery Valley Irrgn:

Letter No.1003 dated 20-9-1919 from the Executive Engineer, No.1 Division, Krishnarajasagara, to the Superintending Engineer, Krishnarajasagara Works.

= = = =

With reference to Government Order No.G.419-69/P/11-19-1 dated the 7th July 1919 directing that all purchases in England and America should hereafter be made through Messrs.Jeremiah Lyon & Co., I have the honor to state that there are certain articles which have been patented and which certain standard firms only are manufacturing, for example Stoney's Patent Sluice Gates required for the dam are now being obtained direct from Messrs.Ransomes and Rapiers of England who are the actual manufacturers of the gates and not mere dealers in manufactured goods.

2. In a case of this kind it would be preferable to place the order direct with the manufacturing firm than through the agents, which only mean an additional expenditure in the shape of commission to the agents.

3. All firms of standing, undertake to despatch the goods after proper examination for which they have the skilled staff necessary. The consignments are always insured and there is no risk of loss. I therefore beg to suggest that Government may be moved to so modify the order that when machinery or other articles are to be purchased from the manufacturers either in England or America, direct, the order need not be placed through the Government Agents. Only goods of a common variety which are manufactured by many firms, such as steel beams, pipes and pipe fittings, ordinary machinery and tools and etc., are to be purchased the orders may be placed through the agents.

9

4. I might also add that instead of sending piecemeal orders it would be more advantageous to determine the general requirements of the Public Works Department for every year in advance and purchase large quantities at a time. It is likely that we will get cheaper quotations in this way than when small quantities are purchased

= = = = =

Read:--

Government Order No. G. 419-69/P.P. 11-19-1, dated 7th July 1919, laying down the procedure in the matter of placing orders for articles to be purchased from foreign countries.

Order No.

Large quantities of foreign made articles, such as machinery etc., are imported annually for the Public Works Department of Government consider that instead of sending orders piecemeal it would conduce to better economy to place an order in advance for the quantities likely to be required for a whole year as more favourable quotations can then be expected and savings effected under freights and other incidental charges.

2. The Chief Engineer is accordingly requested to take necessary action in the matter and to forward for transmission to the Agents, consolidated indents of the requirements of the Public Works Department for 1920-21 after obtaining the sanction of Government in the administrative Department where necessary. In forwarding the indents the following two conditions should be strictly complied with:-

(1) Each indent should be against a [illegible] sanctioned by competent authority and the number and date of sanction should be quoted in the application for purchase, and

Pus

13

(2) each indent should be against a specific grant in the current year's budget or, if the articles are intended to be used in the following year, satisfactory proof should be given to show that provision for the charge will be included and sanctioned in the budget for that year.

3. It is very essential that the indent should be sent well in advance of dates of actual requirements so that progress of works may not be held up pending receipt of the stores, and that a reserve stock should also be provided for the subsequent year against any delays in securing the annual supplies.
